

## Bulletin 17-37 Revised

---

### **Internal Revenue Service Transcript Processing Delayed**

**This Bulletin has been updated with new information; refer to the highlight below.**

The IRS recently added enhanced security features designed to provide additional safeguards against cyber-attacks and hacking which has unfortunately resulted in transcript vendors being unable to obtain transcript results. The IRS is working to resolve the issue.

**The IRS has resolved the issue and transcript vendors are now able to obtain transcript results, however, a back-log is expected.**

Brokers should continue to order transcripts. In the event a loan is scheduled to fund and the transcripts have not been received, HomeBridge will consider exceptions on a case-by-case basis.
