Appraisals must be Uniform Appraisal Data (UAD) compliant and meet Freddie Mac’s Appraiser Independence Requirements (AIR).

Freddie Mac Program Guidelines – Conforming and Super Conforming

Appraisals (cont.)

- A Freddie Mac Submission Summary Report (SSR) is required on all appraisals.
 - **Transactions secured by a 1-unit property:** The appraisal will be sent to the Homebridge Appraisal Department for review, and an additional valuation product may be required, when either of the following is present:
 - The LCA score on the SSR is > 3, **OR**
 - A “Over Valuation” flag is present regardless of the LCA score
 - **Transactions secured by 2-4 unit property and transactions without an LCA score:** The appraisal is acceptable subject to Homebridge underwriter review.
 - **Manufactured Homes:** The appraisal must be completed on [Freddie Mac Form 70B](#) and the appraiser must address the marketability of the property. Refer to the [Appraisals - Manufactured Housing](#) topic for additional appraisal requirements for manufactured housing
 - If an applicable law, regulation or Homebridge policy requires more than one (1) appraisal be obtained, the single most accurate appraisal must be used for underwriting and submission to the Uniform Collateral Data Portal (UCDP)
 - A full appraisal must provide legible interior and exterior original photos of the subject property:
 - The exterior photos of the subject must contain photos of the front, back and street scene
 - The interior photos, at minimum, must include photos of all living areas:
 - Kitchen, (free-standing stove/range or refrigerator not required),
 - All main living areas, including all gathering rooms,

 - Additional photos, as needed of any physical deterioration, improvements, amenities, observed conditions or external influences that materially impact the market value or marketability of the subject property
 - Examples of any recent updates, if present (i.e. remodel, renovation, restoration)
 - Comparable sales photos require the front view of all properties used as comparable sales. The photos must be clear electronic images, which may include copies of MLS photographs, in lieu of original photographs
 - A minimum of 3 closed comparable sales is required. The sources of the closed comparable sales used in the appraisal are subject to the following requirements (excluding rural areas and/or Maine, New Hampshire and Vermont; see **NOTE** below).
 - **At least one of the comparables must be from the [Multiple Listing Service \(MLS\)](#)**
 - The remaining comparables must be from one of the following entities:
 - [Comps Inc.](#), or
 - [Property Navigator](#) (NY only – formerly GeoData), or

- NOTE:** Comparables from a **public independent source are eligible** in rural areas **and/or** in Maine, New Hampshire, and Vermont where MLS is not common; the above policy does not apply

Freddie Mac Program Guidelines – Conforming and Super Conforming

Appraisals (cont.)

- Comparable sales used for new construction properties (subdivisions, PUDs, condo projects, newly converted) are subject to the following:
 - If all three of the comparable sales used to support the value of the subject property were obtained from one of the above sources (public source eligible in New Hampshire, Maine, and Vermont only) no further action is required.
 - If the comparable sales are not all obtained from a MLS, MRIS, MRED, NTREIS, or from an independent source (Vermont and Maine only), the appraiser must comment that the subject property development is being marketed in an “open” or “public” environment (i.e. newspaper advertisements, bill board signs, website, etc.)
 - Additionally, the following applies:
 - One of the comparable sales must be outside the project the subject property is located in and be from an MLS, MRIS, MRED, NTREIS, SABOR, GeoData, Comps Inc. or public source (public source Maine/New Hampshire/Vermont only).
 - Two of the comparable sales must be from sources other than the subject property builder.
 - If the new development or condo project does **not** have any units under contract, all comparable sales may be from outside the development/project however the appraiser **must comment** on the marketability of the development/project and **justify/support** the use of comparable sales from outside the development/project. The appraiser may use comparable sales that are older than 12 months as long as the appraiser can justify and support such use in the appraisal report.
- **NOTE:** The appraiser is always allowed to provide more than three comparable sales to support the property value
- The appraisal must identify and address properties located within a declining market.
- The property must have legal, appropriate ingress and egress. The streets that allow access to the subject property must be maintained in a manner that generally meets community standards. The comparable sales should include street maintenance similar to the subject property. When differences exist between the ownership or maintenance of the subject property street and the comparable sale’s streets, adjustments must be applied as applicable and an explanation is required and the appraisal must address the effect any differences might have on the subject property’s value and marketability.
NOTE: A private road maintenance agreement is **not** required.
- Modular/Prefabricated homes: The appraiser must address the marketability of the property
- Homebridge requires properties to be, at minimum, in average condition. Additionally, the following applies:
 - A conventional heat source with the ability to maintain a temperature of 50° in areas of the property where there is plumbing.
 - Any broken glass that is a health hazard must be removed and the opening closed.
- Properties with an unpermitted addition are eligible subject to the following:
 - The appraiser comments in the appraisal that the addition was completed with “workmanlike quality”
 - The addition does not result in a change in the number of units comprising the property (e.g. a one unit converted to two unit)
 - If the appraiser gives the unpermitted addition value, the appraiser must demonstrate market acceptance by the use of comparable sales with similar additions and address the following in the appraisal:
 - Unpermitted additions are typical for the market area and a typical buyer would consider the unpermitted additional square footage to be part of the overall square footage of the property, and
 - The appraiser has no reason to believe the addition would not pass inspection for a permits
- Appraisal transfers are considered on a case-by-case basis subject to Homebridge management review and approval. If approved a Desk Review, obtained by the Homebridge Appraisal Review Dept., is required
- A new appraisal will be required when the appraisal is dated > 120 days from the Note date

Assets (cont.)

- Business funds of a self-employed borrower may be used for down payment, closing costs and/or reserve requirements subject to the following:
 - The borrower must be listed as an owner on the account. If the borrower's name is not listed on the business account statement, documentation that the borrower is an authorized signer on the account is required. This applies to all business accounts, including sole proprietorships, when business account funds are being utilized for down payment, closing costs and/or reserves. Examples of acceptable documentation:
 - Letter from the bank confirming borrower is an authorized signer, or
 - Online documentation that confirms borrower is an authorized signer
 - NOTE:** Use of business funds when the borrower does not own a significant percentage of the business will be at underwriter discretion (e.g. borrower has a 10% ownership interest and is using a significant amount of the business funds for down payment/closing costs).
 - A cash flow analysis, based on 3 months business bank statements, dated within 60 days of the closing date, is required to determine the withdrawal of business funds will not have a negative impact on the business. The cash flow analysis:
 - Must indicate that the average running balance in the account for the previous 3 months stayed the same or was better, and
 - The amount of funds used for the transaction must not deplete the account i.e. the balance remaining in the account should not be less than half of what was in the account prior to the withdrawal
- Cash on hand, unsecured borrowed funds, and unverified funds are ineligible sources for assets.
- In states where real estate taxes are paid in arrears, prorated real estate tax credits may not be considered an eligible asset. The underwriter must verify the borrower has sufficient assets without relying on any anticipated tax credit except as follows:
 - The Settlement Statement/CD indicates that an escrow account is established and includes the portion of real estate taxes owed by the property seller for the period they owned the property. In this case, a prorated tax credit from the property seller offsets that portion of the charge for the establishment of the escrow account.
- Payout from a life insurance policy is acceptable for down payment or closing costs. A copy of the check or payout statement issued by the insurance company is required. If the cash value is being used for reserves, documentation of the cash value is required however the policy does not need to be liquidated.
- Proceeds from the sale/refinance of a property currently owned by the borrower (including a 1031 exchange or bridge loan) are eligible for down payment and closing costs. The final CD for the existing property must be provided before or at closing to show sufficient net cash proceeds to close the purchase. If a cash-out refinance, the proceeds from the subject refinance cannot be used to satisfy reserve requirements.
- Funds received as a wedding gift from related and/or unrelated persons are an acceptable source of funds for down payment and closing costs for the purchase of a primary residence. The following applies:
 - Documentation the funds were deposited into the borrower's account within 90 days of the date on the marriage license/certificate must be provided, **and**
 - A copy of the license/certificate and acceptable documentation the funds are in the borrower's account is required.
- Funds received as graduation gift from a related and/or unrelated person(s) are an acceptable source of funds for down payment and closing costs for the purchase of a primary residence. The following applies:
 - Documentation the funds were deposited into the borrowers' account within 90 days of the date of graduation from an educational institution must be provided, and
 - A copy of the borrower's diploma, degree, school transcripts, etc. that supports the date of graduation is required
- Deposits that represent funds awarded to the borrower (e.g. disaster relief funds, lottery winnings, court-awarded settlements) are eligible as long as the source providing the funds is not an interested party to the transaction

Assets (cont.)	<ul style="list-style-type: none"> • Real estate commissions earned by a borrower who is a licensed real estate agent are eligible for down payment/closing costs when purchasing a property. The CD must reflect the commission earned and the credit toward the transaction • Credit card rewards points that are redeemed for cash are an acceptable source of funds. If the points have not been redeemed and the cash has not been deposited into the borrower’s account, the following applies: <ul style="list-style-type: none"> - Evidence of the borrower’s ownership of the reward points and their cash value, and - Evidence the points were redeemed for cash prior to closing, and - Evidence the funds were deposited into the borrower’s account OR were directly transferred to the closing agent • Large deposits are considered to be a single deposit where any unsourced portion of the deposit exceeds 50% of the combined gross monthly income of the borrower(s). If the deposit includes both sourced and unsourced funds, only the unsourced portion is used to calculate whether the deposit meets the 50% definition. Direct deposits, such as IRS or state income tax refunds, transfer of funds between verified accounts, that are easily identified on the account statement do not require documentation. <ul style="list-style-type: none"> - Large unsourced deposits must be explained and verified - Requirements for documenting large deposits are as follows: <ul style="list-style-type: none"> - Refinance Transactions: Large deposits are not required to be sourced and explained however, at underwriter discretion, explanation and sourcing may be necessary as Freddie Mac requires any payment on borrowed funds be included in the DTI ratios. - Purchase Transactions: If the funds from a large deposit are needed for the down payment, closing costs or reserves on the transaction documentation must be provided that the funds are from an acceptable source. Any undocumented large deposit will be deducted from the amount of verified funds and the reduced asset amount will be used for qualification. The only acceptable sources of deposits are the following: <ul style="list-style-type: none"> o The borrower’s income o Funds awarded to the borrower (e.g. disaster relief funds, lottery winnings, court-awarded settlement, etc.) provided the source is not an interested party to the transaction o Funds derived from eligible asset types (e.g. depository accounts, securities, gift funds, etc.) <p>Examples:</p> <ol style="list-style-type: none"> 1. The borrower has a monthly income of \$4,000 and a bank account with a balance of \$20,000. A deposit of \$3,000 was made but \$2,500 of the deposit is documented as the borrower’s tax refund (sourced). In this example only the \$500 is considered “unsourced” (\$3000 total deposit minus \$2500 tax refund) and is included in the large deposit calculation. The unsourced \$500.00 is only 12.5% of the borrower’s monthly income therefore it does not meet the large deposit definition (50% of the borrower’s total monthly qualifying income). In this example, documentation is not required and the entire \$20,000 balance in the borrower’s bank account may be used for underwriting purposes. 2. The same borrower has a deposit of \$3,000 but only \$500 is documented as the borrower’s tax refund (sourced) leaving \$2,500 has unsourced. In this example the unsourced \$2,500 is 63% of the borrower’s \$4,000 monthly income which does meet the definition of a large deposit. The unsourced \$2,500 must be deducted from the borrower’s \$20,000 bank account balance leaving \$17,500 that may be used for underwriting purposes. 3. The same borrower has 3 separate unsourced deposits of \$1800 which technically does not meet the 50% of the borrower’s gross monthly income requirement since each deposit is less than \$2,000 (50% of \$4,000) however at underwriter discretion sourcing/documentation may be required. <ul style="list-style-type: none"> • Funds from outside the United States that will be needed for closing are eligible subject to the following: <ul style="list-style-type: none"> - Funds must be transferred into a U.S. financial institution (cannot go directly to closing agent/escrow) and funds must be verified in U.S. dollars prior to loan closing, OR - The combined value of the assets must be at least 20% greater than the amount from these assets need for closing, AND - All documents of foreign origin must be filled out in English or the originator must provide a translation, attached to each page that warrants the translation is complete and accurate, AND - All foreign currency amounts must be converted to U.S. dollars at the time of translation

- **Installment Debt**

- Installment debt is considered as a recurring monthly debt obligation and included in the borrower's long-term debt when there are more than 10 months payments remaining.
- Installment debt with ≤ 10 months remaining will be considered as a recurring monthly debt obligation if it significantly affects the borrower's ability to meet their credit obligations. If installment debt is excluded based on ≤ 10 months remaining the credit report or other documentation must be provided that reflects ≤ 10 months payments remaining

NOTE: All **lease payments** (auto, furniture, appliances, etc.) **regardless of the number of payments remaining**, must be included in the borrower's monthly debt

- If the revolving account is to be paid off at or prior to closing, a monthly payment is not required to be included in the debt ratio. The account does not need to be closed as a condition of excluding the payment from the borrower's debt ratio.
 - If the revolving account is to be paid off prior to closing, documentation that the debt was paid in full and source of funds must be provided and verified.
 - If the revolving account is to be paid off at closing, the payoff must be shown on the Closing Disclosure.

Employment History

Generally, a borrower should have a minimum 2-year employment history.

If a borrower has less than a 2-year employment history, the Homebridge underwriter will determine the stability of the income by reviewing the income and/or employment characteristics and the overall loan risk factors including the borrower's demonstrated ability to repay. See wage earners or self-employed topics below for requirements

Wage Earners

The justification for allowing < 2-years employment must be included in the loan file. **Examples of < 24 months income that may be acceptable, include, but are not limited to:**

Newly Employed

The income earned by a borrower with less than a 2-year employment history may be used for qualifying if documentation is provided the borrower was attending school or in a vocational/ training program immediately prior to their current employment.

Re-Entering the Workforce

If the borrower is re-entering the workforce after an extended absence, for any reason, the employment may be considered stable if documentation is provided to support a stable employment history that directly preceded the extended absence.

Gaps in Employment

Any gaps in employment > 30 days requires documentation explaining the reason for the gap

Fluctuating Hourly Employment

If a borrower's income is derived from fluctuating hourly employment earnings, the borrower must have a **minimum of 12 month employment history**; less than 12 months is **not** allowed. The required minimum 12 month history must be derived from either:

- The borrower's current fluctuating hourly employment, **or**
- A combination of current and prior fluctuating hourly employment, **or**
- A combination of current fluctuating hourly employment and prior salaried employment in a similar industry or job type that had an income level consistent with the current income level based on the income trend analysis

Refer to the [Fluctuating Hourly Employment Income](#) topic for details on calculating the income

Secondary Employment

Borrowers with less than 24 months secondary employment history, **but have a minimum 12 month** secondary employment history, may have an employment history that is considered stable if the underwriter can justify the stability of the employment. **< 12 months secondary employment history is ineligible.** Examples that may support < 2-year secondary employment history include, but are not limited to, the following:

- The borrower previously held a job with base non-fluctuating earnings working 40 hours per week for multiple years; however, due to reasons such as position elimination, work for reduction, or illness, the borrower is not longer employed at this job and is now working at multiple part-time jobs that, when combined are similar in hours and pay to the previous full-time job. Since the borrower's full-time employment ended 18 months ago, the length of employment at each part-time job is in the range of 13 to 15 months. In this example an employment history of < 24 months may be acceptable if the earnings are consistent and the borrower has shown their ability to repay obligations
- The borrower is employed in the educational system as a teacher. During the previous summer the borrower taught summer school within the same educational system and is now starting teaching summer school for the current year. Although a 2-year history is not fully developed, given the job type and current employment situation, the underwriter may be able to justify including the summer school income provided an accurate qualifying amount can be established and documented based on the previous and current earnings. The underwriter may request additional documentation to determine the stable monthly income (e.g. how many classes, documentation supporting income, is the income similar to prior year, etc.)

	Determining Earnings Types
Earnings Type	Requirements and Guidance
Base Non-Fluctuating Employment Earnings	<p>Base non-fluctuating employment earnings are stable and consistent earnings that may be salaried or hourly. Base non-fluctuating employment earnings may include:</p> <ul style="list-style-type: none"> • Exempt (salaried) • Military base (basic) pay • Non-exempt (hourly) earnings. The pay rate and number of hours are reflected on an ongoing consistent basis for each pay period and must be supported by the YTD income. If the only reason the earnings fluctuate is because of the additional employed income (e.g. overtime), the base earnings are still considered non-fluctuating <p>Minor Fluctuations in Hours</p> <p>Minor variations in base hours on paystubs (e.g. borrower clocked out a few minutes early) are acceptable and may be treated as base non-fluctuating earnings when the variation is no more than an hour per week. Minor variations do not automatically render the base earnings as fluctuating if the historical earnings support the level of pay.</p> <p>Example: The pay frequency is weekly. The current YTD paystub shows 39.78 hours while the prior paystub shows 40 hours. The YTD income reasonably supports 40 hours per week of gross pay and the prior year W-2(s) support a similar amount of pay.</p> <p>Exception for Non-Exempt Earnings: Primary Employment Earnings with Minimum Required Hours</p> <p>Borrowers with primary employment earnings that fluctuate but have a position with a minimum number of required hours, the earnings may be considered non-fluctuating, and the minimum required hours are acceptable to use for gross pay when following requirements are met:</p> <ul style="list-style-type: none"> • Homebridge must obtain written documentation from the employer confirming the minimum required hours (i.e. written verification of employment (VOE), offer letter or equivalent documentation) • The documented minimum required hours must be supported by YTD income and prior year, as applicable <p>NOTE: Only the minimum required hours may be considered non-fluctuating. The requirements for fluctuating employment earnings apply to any additional hours used to qualify the borrower.</p> <p>Example (minimum required hours):</p> <p>The borrower has been with the current employer as a nurse with a hospital for 4 months; prior to that the borrower was in nursing school. The written VOE verifies the borrower works three 12-hour shifts each week, which is common for this profession and the YTD earnings support at least this level of gross pay. Based on this, it is acceptable to consider these the minimum required hours and use 36 hours weekly gross pay for the income calculation</p> <p>Continuance</p> <p>Income must be likely to continue for a minimum of 3-years</p>

	<p>Base Fluctuating Hourly Employment Earnings</p>	<p>Base fluctuating hourly employment earnings are not pre-determined and may fluctuate each pay period.</p> <p>Example #1:</p> <ul style="list-style-type: none"> The pay frequency is weekly The current YTD paystub shows 37 hours worked The prior pay period YTD paystub shows 31 hours worked This typically an indication that the base hours fluctuate <p>Example #2:</p> <ul style="list-style-type: none"> The pay frequency is weekly The paystub shows 37 hours at a pay rate of \$30 per hour and reflects 6 months of YTD income. If the borrower worked 37 hours every week, the YTD earnings are approximately \$28,860, however the YTD base earnings on the paystub are \$20,240. This income documentation shows fluctuating hourly earnings so additional documentation is necessary to determine otherwise. <p>In addition, when the borrower’s employed income is derived from base fluctuating hourly employment earnings, the borrower must have at least a 12 month history of employment. The required minimum 12 month history must be derived from one of the following:</p> <ul style="list-style-type: none"> The borrower’s current fluctuating hourly employment A combination of current and prior fluctuating hourly employment A combination of current fluctuating hourly employment and prior salaried employment in a similar industry or job type that had an income level consistent with the current income level based on trend analysis. Refer to the Income Calculation Method and Trend Analysis topic for details <p>Continuance Must be likely to continue for a minimum of 3-years</p> <p>NOTE: This guidance does not apply to additional employed income (e.g. commission, bonus, overtime, etc.) Refer to the Documented Income Breakdown (e.g. bonus, OT, commissions, etc.) topic for requirements</p>

	Pay Frequency	<p>The Homebridge underwriter must determine the frequency of payment (weekly, bi-weekly, semi-monthly, monthly, quarterly, annually) for all income used to qualify the borrower to accurately analyze and calculate the stable monthly income</p> <p>Example: The borrower received an annual bonus in February of the prior year and current year as evidenced by the written VOE dated March of the current year. The bonus amounts are consistent based on the income trend analysis. Since the bonus is paid on an annual basis, the amounts received in the current and prior year must be averaged over a 2-year period.</p> <p>It is not accurate to average the prior year and YTD number of months on the income documentation (e.g. 15 month average)</p>
	Documented Income Breakdown (e.g. bonus, OT, commissions, etc.)	<p>A documented breakdown between the base non-fluctuating earnings or fluctuating hourly earnings and the additional employed income (e.g. bonus, OT, commission, tips) ensures the most accurate analysis and calculation of stable monthly income.</p> <p>While a documented breakdown is not required in all instances, one may be used to support a higher amount of qualifying income, verify bonus pay frequency and/or support fluctuating income when the degree of fluctuation exceeds 10%</p> <p>Verification Method: A written VOE and year-end and current YTD paystubs that show the breakdown between the earnings type and additional employed earnings (OT, bonus, commissions)</p>
Verification of Pay Raises and Using a Pay Increase in Calculation of Income	<p>Merit, promotional, or other types of increases in pay may justify using different averaging methods for fluctuating hourly earnings based on the application of the new pay rate to the average hours worked for the prior year and YTD</p> <p>While documentation to verify pay raises is not required in all instances, it may be used to support a higher amount of qualifying income and/or support fluctuating hourly earnings when the degree of fluctuation exceeds 10%</p> <p>Verification Method: A pay raise(s), may be verified using paystubs from the current or prior year that show the new and old rates of pay when the raise occurred and/or year-end paystubs will likely be necessary to complete verification</p> <p>Calculation Method: For consistent and increasing income trends, one of the options below will be utilized:</p> <ul style="list-style-type: none"> • Option 1: Average the most recent year and YTD income over the applicable number of months of required history and documentation • Option 2: Apply the current pay rate to the average number of hours worked during the prior year and the current year, provided the hours worked during the prior year and the current year are consistent or increasing and documented.

	Calculation: Excluding Time Periods Based on a Specific Event Unlikely to Recur	<p>In certain instances, income may be calculated using a shorter time period, however, Homebridge must provide a written justification and/or documentation supporting the months used in the calculation.</p> <p>When excluding a time period based on a specific event that is unlike to recur, at least 12 months of stable monthly income must still be used in the calculation. These 12 months do not need to be consecutive (i.e. the period impacted by the non-recurring event can be excluded)</p> <p>Example:</p> <p>The borrower has a 10 year employment history as a restaurant manager. The June 2025 YTD paystub, 2024 W-2 and 2023 W-2 have been provided</p> <p>While the June 2025 YTD paystub and 2023 W-2 earnings support approximately \$60,000 in base earnings per year, the 2024 W-2 earnings are low at \$30,000</p> <p>Documentation in the loan file verifies that the restaurant was closed for renovations from April through September of 2024, which supports a justifiable one-time event and the resulting reduced earnings, so it is reasonable to exclude the 2024 earnings from the calculation and average the 2025 YTD and 2023 earnings over 18 months or take the 2024 earnings for 6 months and 2025 YTD earnings of 6 months to get an average across 12 earning months (ignoring the specific event)</p>

Financing Concessions

Financing concessions are IPCs that may **only** be used to pay:

Routine Repairs

The below repairs are considered routine repairs and **are not** considered critical:

- Repairs that are preventive in nature or are part of normal capital replacements (e.g. items focused on keeping the project fully functioning and serviceable), **and**

- **Properties Listed for Sale:** Properties listed for sale must be taken off the market on or before the disbursement date of the new loan **AND** primary residence transactions require the borrower to provide written confirmation of their intent to occupy the property
- **Continuity of Obligation:**
 - A continuity of obligation is required on all refinance transactions. Continuity of obligation is met when at least one borrower on the existing mortgage is also a borrower on the new refinance transaction.

NOTE: Continuity of obligation does **not** apply to properties owned free and clear (i.e. no mortgage lien) due to the borrower purchasing the property with all cash **or** the prior mortgage that the borrower was obligated on has been paid in full.
 - Exceptions to the above continuity of obligation requirements are:
 - The borrower has been on title **and** living in the property for at least 12 months, measured from the date of the event (such as transfer of title) to the disbursement date of the new loan, but is not obligated on the existing mortgage but has paid the mortgage, payments, including any secondary financing, on time for the most recent 12 months, **or**
 - One of the borrowers inherited or was legally awarded the property in accordance with a final judgment or decision from a legal body (e.g. court, jury, judge, or arbitrator) such as in a case of divorce, separation or dissolution of a domestic partnership

NOTES:

 1. A living trust may be made irrevocable by the Settlor's death. For a borrower to be eligible for the refinance transaction, the borrower must continue to be a living trust that meets all FHLMC eligibility requirements
 2. Transfer of ownership from a corporation or LLC to an individual does not meet the continuity of obligation requirements
- **Financing Delinquent Real Estate Taxes** – the following applies to financing delinquent real estate taxes:

 - Any delinquent taxes that exceed the cash-back limitation must be paid by the borrower using borrower own funds outside of closing
