Receipt must be verified by copies of checks or contracts/agreements with the governmental agency.

Although continuation of the homeownership voucher subsidy beyond the first year is subject to Congressional appropriation, for the purposes of underwriting, the subsidy will be assumed to continue for at least three years. - If the borrower is receiving the subsidy directly, the amount received is treated as income. The amount received may also be treated as nontaxable income and be "grossed up" by 25 percent, which means that the amount of the subsidy, plus 25 percent of that subsidy may be added to the borrower's income from employment and/or other sources. - The subsidy will be treated as an "offset" to the monthly mortgage payment (that is, reduce the monthly mortgage payment by the amount of the home ownership assistance payment before dividing by the monthly income to determine the payment-to-income and debt-to-income ratios). Income – Interest and Dividend	Investment income may be used as stable monthly income. When markets are stable, documented earnings may generally be used. During periods of volatility or when verified earnings do not appear to be supported by current market conditions, Homebridge will use an earnings rate of 3%. To include interest or dividend income from cash or marketable securities in qualifying income, the following guidelines will be used: • The income has been received for the past two years as verified by tax returns. • Verification that the underlying cash deposits and/or securities still exist must be obtained within 30 days of closing, • Any required funds necessary for closing on the subject transaction will be subtracted prior to the calculation of interest/dividend income. If using the accounts for funds to close, the underwriter will impute a 3% return on the remaining assets with no amortization of the account balance. • Year-to-date interest and dividend income will be averaged with the last two years as verified by the borrowers' tax returns, unless declining, • Year-to-date earnings will be imputed by applying a realistic market-rate of interest to the account balances and averaging over the number of months, • Margined securities in the calculation of interest/dividend income will not be included • Interest from pass-through tax entities (partnerships and S corporations) may be included provided the borrower can document they still own the interest producing the income in question
Income – K-1	A borrower who is relying on K-1 income from an entity as part of their qualifying income does not need to document a history of receipt of distributions from said entity to utilize the income to qualify. Borrowers Recently Converted to K-1 A borrower who has recently been made a partner in their employer (typically but not necessarily a law firm, accounting firm, etc.) may also have their income considered stable. Borrowers must provide their most recent two year's tax returns with all supporting documents and a copy of their partnership agreement. Income will be calculated based on the most recent two years' W-2 income compared with any guaranteed payments they are to receive under their new compensation structure. Guaranteed payments must be in line with previous salary utilized to qualify. A minimum of two years of employment in the same line of work must be verified. Borrowers Switching Employers and Converting to K-1 Borrowers who are switching employers AND changing from a W-2 to K-1 position may be considered, provided the ownership interest in the new firm is of a minimal nature. The calculation of the income in this situation shall be the more conservative of guaranteed payments or historic income. A minimum of two years of employment in the same line of work must be verified. Borrowers who become a partner in their current employer with an ownership interest greater than or equal to 25% may also be considered under this guideline. In addition to two years of personal income tax returns, the company's most recent two years of tax returns must be provided to ensure no losses were incurred by the business which would need to be considered. A minimum of two years of employment in the same line of work must be verified.
Income – Other	Other income sources, whether taxable or non-taxable, must be verified unless otherwise indicated in the specific Product Profile. Non-taxable income should be distinguished from non-reported income as non-taxable income sources are not taxed, the "value" to the borrower is greater. Unless otherwise noted, all non-taxable income sources may be grossed up by a factor of 25% provided the non-taxable status of the income is verified. All sources of income included in the loan qualification must be stable, with a reasonable expectation that at least the same level of income will continue to be received for a minimum of three years. Provided there is no evidence that the income source will cease within the next three years, it can be reasonably assumed that the income will continue. In no case can income be used for qualification if there is any knowledge or documentation indicating that the income will terminate within the next three years.

Income – Rental	<u>Rental income – Investment Property</u> Rental income from investment properties may be used as qualifying income. Generally, the Borrower does not need a history of managing properties in order to rely on rental income, except as otherwise specified below. Method One Tax Returns The net figure on schedule E page 1 of most recent year's tax return will be utilized. Depreciation, amortization and interest claimed will be added back. Deduct the principal and interest component of the mortgage payment(s) tied to the property (if any). Current property tax, property insurance and homeowner's association dues expenses do not need to be documented. For purposes of determining PITIA on non-subject rental properties owned, 1/12th of expenses claimed on the 1040's may be used. Method Two Lease Use 75% of current lease less documented PITIA (principal, interest, taxes, insurance, and homeowner's association dues). Income – Temporary Leave	Temporary leave from work is generally short in duration. Borrowers on temporary leave may or may not be paid during their absence from work. If a borrower will be on temporary leave at the time of closing of the mortgage loan and that borrower's income is needed to qualify for the loan, Homebridge must determine allowable income and confirm employment as described below: • The borrower's employment and income history must meet standard eligibility requirements • The borrower must provide written confirmation of his or her intent to return to work • Document the borrower's agreed-upon date of return by obtaining verification either from the borrower or directly from the employer (or a designee of the employer when the employer is using the services of a third party to administer employee leave). • There must be no evidence or information from the borrower's employer indicating that the borrower does not have the right to return to work after the leave period • A verbal verification of employment will be obtained by Homebridge. If the employer confirms the borrower is currently on temporary leave, the borrower will be considered employed • The borrower's income will be verified in accordance with the other provisions of this guide. The amount and duration of the borrower's "temporary leave income" must be obtained which may require multiple documents or sources depending on the type and duration of the leave period and "regular employment income." The latter may include but is not limited to, the income the borrower receives from employment on a regular basis that is eligible for qualifying purposes (for example, base pay, commissions, and bonus). NOTE: Income verification may be provided by the borrower, by the borrower's employer or by a third- party employment verification vendor. Requirements for Calculating Income Used for Qualifying If the borrower will return to work as of the first mortgage payment date the borrower's regular employment income will be used for qualifying. If the borrower will not return to work as of the first mortgage payment date, the lesser of the borrower's temporary leave income (if any) or regular employment income will be used. If the borrower's temporary leave income is less than their regular employment income, supplement the temporary leave income with available liquid financial reserves. These reserves would be in addition to any other reserves required. • Supplemental income amount = available liquid reserves divided by the number of months of supplemental income • Total qualifying income = supplemental income plus the temporary leave income • Available liquid reserves = subtract any funds needed to complete the transaction (down payment, closing costs, other required debt payoff, escrows, and minimum required reserves) from the total verified liquid asset amount. • Number of months of supplemental income: the number of months from the first mortgage payment date to the date the borrower will begin receiving his or her regular employment income, rounded up to the next whole number. After determining the supplemental income, the total qualifying income is calculated. The total qualifying income that results may not exceed the borrower's regular employment income. The same assets utilized to meet the liquid reserve requirement may not be used for asset distribution.

Bank Statement Documentation Eligibility and Summary	
Bank Statement	
Documentation of Income (cont.)	Business Bank Statements - Borrower(s) combined ownership of the business must be 25% or more 12 or 24 months most recent business bank statements. Statements from multiple accounts are acceptable however the same calculation method must be applied (see options below) - Multiple businesses may also be used to determine qualification provided each is separately verified and meet these guidelines - Transfers between business accounts OR from personal to business accounts are not considered deposits and therefore are not considered income - Any deposits that appear to be atypical or inconsistent (defined as exceeding 50% of average eligible monthly deposits) must be sourced and documented to be considered as part of the borrower's income - Personal liabilities paid by the borrower's business require 6 months most recent business bank statements to exclude the debt from the DTI - Installment debt/auto lease with a history of being paid by the business, that have since been paid in full and then replaced with similar/new debt may only be excluded from the DTI if the new liability payment is $\leq$ to the previous/original payment Documenting Bank Statement Income There are 3 methods for documenting business bank statement income Method One: Uniform Expense Ratio - The underwriter multiplies the eligible deposits received by 50% expense ratio. NOTE: If the borrower has an expense ratio > 50% the higher percentage will be used for qualifying - The above result is multiplied by the borrower's ownership percentage and divided by 12, or 24 as applicable - If the expense ratio is reasonable for the borrower's line of work, no further information is required NOTE: Rental income may be included as income when utilizing the uniform expense ratio Refer to the Rental Income - Subject Property Refinance topic or Rental Income - Non-Subject Property topic, as applicable, for additional information Method Two: Profit and Loss Statement - Requires a P&L provided by a CPA/EA/CTEC* for the most recent 12, or 24 months as applicable. The P&L must cover the same 12 or 24 month period as the bank statements provided - If the deposits on the business statements support a minimum of 75% of the gross receipts listed on the P&L the P&L may be used for qualifying based on the borrower's pro-rata share of ownership. The resulting income should be reasonable for the borrower's line of work. Method Three: CPA Letter for Expense Ratio - A letter provided by a CPA/EA/CTEC* stating the business' expense ratio based on the most recent year's tax return is required. The letter may not include any disclaimers as to the accuracy of the information - Multiply the expense ratio by the business' total deposits over the 12 or 24 month period shown on the bank statements. Deduct that figure from the total deposits. Multiply net deposits by the applicant's pro-rata ownership percentage and divide by 12 or 24 as applicable. The resulting income should be reasonable for the borrower's line of work *NOTE: Only individuals with the above licenses/designations are considered acceptable. All tax preparers are required to have a PTIN, however preparers with only a PTIN and without one of the above designations are not acceptable
